SUMMARY

Automation-focused Python Developer (1.5+ years) skilled in Python, n8n, APIs, and AI tools. Built automation, scraping, and funnels improving efficiency 95%, boosting engagement 3x and conversions 25%+.

EDUCATION

Bachelor Of Computer Applications, Information Technology

Veer Narmad South Gujarat University • Surat, Gujarat • 2022 • 6.90

EXPERIENCE

Software Engineer

Clicode Private Limited

December 2025 - Present, Ahmedabad, Gujarat, India · Remote

- Built AI Agents using n8n to automate workflows, reducing manual effort by 80%.
- Developed Python-based browser automation scripts, improving execution speed by 4x.
- Implemented logging and error-handling mechanisms, reducing debugging time by 70%.
- Designed and optimized n8n workflows integrating multiple APIs, improving process efficiency by 65%+.

RPA Developer | Agentic AI Developer

The Automation Lab

December 2024 - December 2025, Ahmedabad, Gujarat, India · On-site

- Designed and deployed RPA solutions using n8n for coaching and real estate businesses, reducing manual effort by 75%+.
- Built and optimized n8n workflows with complex logic and API integrations for lead management and operations, improving efficiency by 60%+.
- Developed AI-powered agents using n8n for automated responses and decision-making, reducing human dependency by 50%+.
- Monitored and enhanced automation performance via n8n orchestration, achieving 99% reliability and reducing downtime by 40%.

Internship Trainee | Python Developer

Axisray

February 2024 - November 2024, Ahmedabad, Gujarat, India · On-site

- Built and deployed Python-based web applications, improving backend performance and scalability by 40%+.
- Developed APIs and web services using Flask and Django, reducing response time by 30%+.
- Applied OOP principles and best practices, enhancing code quality and maintainability by 50%+.
- Optimized code through reviews and debugging, reducing bugs and improving issue resolution speed by 2x.

PROJECT

Automated News Scraping & AI Content Publishing System using Python and n8n

Clicode Private Limited • March 2026 - April 2026

- Built a Python-based data scraper to extract Spanish news (title, text, images), increasing content collection speed by 5x.
- Developed n8n workflows integrated with AI (Gemini) to rewrite and format scraped content, reducing manual editing effort by 85%.
- Developed Python-based automation pipelines for data scraping and publishing, reducing manual effort by 95%.
- Implemented duplicate detection and automated database storage, improving data accuracy by 95%+ and maintaining clean content pipelines.

End-to-End Browser Automation & Data Sync Pipeline using Python

Clicode Private Limited • January 2026 - February 2026

- Integrated Frappe APIs with Python automation, enabling seamless data transfer and reducing manual data handling by 90%.
- Developed Python-based browser automation scripts to auto-fill and process data on web platforms, improving execution speed by 4x.
- Automated Excel generation and direct attachment to Frappe Doctype, eliminating manual downloads and reducing processing time by 80%.
- Built an automated notification system, triggering real-time email alerts to Doctype creators and improving workflow responsiveness by 3x.

Automated Data Scraping & PDF Processing Pipeline using Python and n8n

Clicode Private Limited • December 2025 - January 2026

- Developed a Python-based data scraper to extract structured data from web tables, improving data collection speed by 5x.
- Built n8n workflows to extract data from attached PDFs and process unstructured content, achieving 90%+ data accuracy.
- Integrated AI-based data formatting (Gemini) within n8n pipelines, reducing manual data cleaning effort by 80%.

- Automated end-to-end data flow by sending processed data via API to Frappe Doctype, reducing manual entry by 100% and improving efficiency by 70%.

Sales Funnel & Course Delivery Automation

The Automation Lab • February 2025 - March 2025

- Built a fully automated sales funnel, converting ad traffic into paid enrollments and reducing manual operations by 100%.
- Designed a high-converting landing page with Funnel Marvel integrated with Facebook/Instagram ads, increasing conversion rate by 45%+.
- Integrated Razorpay checkout with webhook automation, enabling real-time data capture and reducing processing time by 70%.
- Implemented automated WhatsApp confirmations and Google Sheets tracking, improving customer experience and response time by 3x.

Webinar Funnel Automation System

The Automation Lab • January 2025 - February 2025

- Designed and deployed a fully automated webinar funnel using n8n, increasing attendance rate by 40% and reducing manual effort by 90%.
- Built and integrated n8n workflows with Google Sheets, Zoom, and APIs, improving lead capture efficiency and data accuracy by 60%+.
- Developed n8n-based automation for WhatsApp reminders and follow-ups, boosting user engagement by 3x.
- Implemented advanced logic and segmentation within n8n workflows, increasing conversion rates by 25%.

SKILLS

Automation Tools: N8n, Pabbly, Power automate

Tools & Technologies: Python, Javascript, HTML, JSON, PhpMyAdmin, Flask, AWS Lambda, Amazon Relational Database Service (RDS), C (Programming Language), C++, HTML5, Cascading Style Sheets (CSS), JavaScript, Bootstrap (Framework), AJAX, jQuery, PHP, MySQL

Interpersonal Skills: Creative Problem Solving, Team Leadership, Team Management, Problem Solving, Analytical Skills

Other Skills: Amazon Bedrock, AI Agents

CERTIFICATIONS

Python Essentials 2

Cisco • 2026

N8n Course: No code AI Agent Builder

Simplilearn • 2026
